Work Experience

Marquistech *Vilnius, Lithuania*

Test Engineer *November 2025 – Present*

- Capture device and network logs (QXDM, QCAT, ADB) to identify modem, RF, and protocol-level issues in unreleased mobile phones for major OEMs
- Reproduce and validate network-related problems including attach failures, handover issues, throughput drops, and IMS/VoLTE/5G NR anomalies for accurate root-cause analysis.
- Document findings with detailed logs, reproduction steps, KPIs (RSRP/RSRQ/SINR), and impact assessment for engineering review.
- Share structured reports and issue summaries with OEM, chipset, and carrier teams to support debugging, software updates, and acceptance testing.

UNITY *Vilnius, Lithuania*

JUNIOR TEST ENGINEER *November 11, 2024 – April 5, 2025*

- Identified, documented, and tracked bugs to resolution, ensuring efficient communication with customers and developers with a weekly target of 20 cases
- Designed, executed, and maintained automated and manual test cases for various software components and environments including IL2CPP, DOMS, and other relevant systems cases
- Stayed current with industry trends and emerging technologies to continuously refine testing methodologies and enhance tools, including ad-hoc and exploratory approaches
- Identified regressed versions of software and provided initial fixes or workarounds for critical issues
- Working on managing a QA lab with a diverse range of devices and machines, ensuring seamless testing operations and enabling secure remote access for distributed teams and developed internal FTP servers for Unity's internal workflows

UAB FIRST RIDDLE *Vilnius, Lithuania*

SOFTWARE DEVELOPMENT INTERN *December 9, 2023 – April 8, 2024*

- Designed and developed test website, improving user experience and engagement for the company's e-commerce platform
- Managed a product catalog, optimizing SEO and social media strategies, resulting in a 120-140% increase in website traffic
- Designed and deployed a robust user query and message database, reducing data retrieval time by 40% and enhancing customer support efficiency by 25%
- Cultivated robust relationships across departments and executive levels, driving a 15% increase in cross-functional collaboration and resulting in a 20% improvement in project completion rates

Technical Skills

QA Skills: Cross Platform Testing, regression, Structured Debugging, Jira, API Testing
Software Development: REST API, React Js, Next Js, UI/UX, MongoDB, MS SQL
Programming languages: C#, C++, Python, JavaScript
Additional Skills: Plastic SCM, Android Studio, GitHub, Linux, custom operating systems

Projects

Passenger Messenger *typescript, react, next auth, cloudinary, pusher, Mongo DB*

THIS WEB APPLICATION IS A MODERN MESSENGER CLONE BUILT USING A ROBUST TECH STACK, INCLUDING TYPESCRIPT, REACT, NEXT.JS, AND NEXTAUTH FOR AUTHENTICATION. IT LEVERAGES CLOUDINARY FOR MEDIA STORAGE AND HANDLING, PUSHER FOR REAL-TIME UPDATES, AND MONGO DB AS ITS DATABASE.

https://github.com/abhayverma2108/passengermessenge

PORTFOLIO WEBSITE *Javascript, Vite, React*

CREATED A RESPONSIVE PORTFOLIO WEBSITE USING HTML, CSS, JAVASCRIPT, VITE, AND REACT JS. THE SITE SHOWCASES MY PROJECTS AND SKILLS WITH AN INTUITIVE INTERFACE AND MODERN DESIGN.

https://abhayv175.netlify.app

MOVE IT

HTML, CSS, Bootstrap, JavaScript, React js, MongoDB

MOVE IT IS YOUR GO-TO COURIER SERVICE, DESIGNED WITH A SLEEK HTML, CSS, AND JAVASCRIPT WEBSITE FOR EASY NAVIGATION. QUICKLY SCHEDULE PICKUPS, TRACK SHIPMENTS, AND EXPLORE OUR RELIABLE SERVICES. TRUST MOVE IT TO DELIVER YOUR PACKAGES SWIFTLY AND SECURELY.

https://abhayverma2108.github.io/MOVE-IT/

BANKING APPLICATION

Java, JavaFX, CSS, Scene Builder(fxml)

DEVELOPED A BANKING APPLICATION USING JAVAFX, SCENEBUILDER, AND CSS. THE APPLICATION FEATURES A USER-FRIENDLY INTERFACE DESIGNED WITH SCENEBUILDER AND ENHANCED WITH CUSTOM CSS STYLING. IT SUPPORTS VARIOUS BANKING OPERATIONS, ENSURING A SEAMLESS USER EXPERIENCE

https://github.com/abhayverma2108/Bank_Application

GREEK VOCABULARY APPLICATION

Flutter, Dart, Swift, Android Studio, Emulators

THIS FLUTTER-BASED PROJECT FOCUSES ON GREEK VOCABULARY FOR TRAVEL AND FOOD, USING ON-SITE STORAGE TO TRACK TASKS AND PROGRESS. FUTURE PLANS INCLUDE A SERVER-SIDE APPLICATION. DATA IS MANAGED WITH JSON AND SQLITE, DEVELOPED IN DART.

https://github.com/BenBinary/greek_vocs

PIKA PANIC

Unity, C#, Plastic SCM

PIKA PANIC IS AN ENGAGING GAME BUILT USING UNITY ENGINE, SHOWCASING DYNAMIC GAMEPLAY AND IMMERSIVE VISUALS. DEVELOPED WITH THE HELP OF UNITY VERSION CONTROL (PLASTIC SCM), THE PROJECT HIGHLIGHTS EFFICIENT COLLABORATION AND ASSET MANAGEMENT. FEATURING UNIQUE LEVELS, WITH REAL WORLD REFERENCES FROM UNITY VILNIUS OFFICE, UNIVERSITY ETC. IT COMBINES TECHNICAL PRECISION WITH CREATIVE STORY TELLING FOR A SEAMLESS AND CAPTIVATING PLAYER EXPERIENCE.

Education

Vilnius Gediminas Technical University

Vilnius, Lithuania

Bachelor's in Science in INFORMATION TECHNOLOGY

September 2021 – Present

University of West Attica

ERASMUS in INFORMATION TECHNOLOGY

August 2021 – February 2022

GPA: 10
